

Product Manager

Predicine Inc., Hayward, California

Job ID: 000038

Predicine Inc. is an international precision medicine organization that is committed to developing the first- and best-in-class precision diagnostics products to enable precision medicine and to address the unmet medical needs in US, China, and worldwide. At Predicine, we believe that people are our most vital assets and we are dedicated to creating a great place to work. We value a culture of innovation, integrity, responsibility, productivity, and teamwork, and invite people who share the same values to join us.

The position

We seek a highly motivated and talented individual to lead the capacity building effort of outbound product marketing activities, as well as internal R&D and collaboration projects at Predicine. Under the guidance of Marketing Director, the incumbent will be responsible for coordinating the operational aspects of projects operated at Predicine, closely working with internal R&D and operation team and customers to ensure projects are carried out with sound design, informative summary, and according to technic/Quality/Timeline guide. The successful candidate is expected to effectively develop and execute on innovative projects, publish exciting research in high quality scientific, technical or medical journals, present at professional meetings and promote collaborative efforts to push precision translational sciences forward. This individual is expected to be, or develop into, externally recognized expert in precision diagnostics and medicine.

As an Associate Product Manager, you are expected to:

- Coordinate all operational aspects of internal R&D or external collaboration projects, including development of timelines, metrics, and deliverables.
- Ensure project are carried out according to the budget, timeline, labor resources.
- Provide continuous communications and project updates to the stakeholders and will be in an external facing position.
- Work closely with Business Development and Marketing team to develop and implement positioning and messaging, sales collateral, training materials and other sales enablement programs to achieve revenue targets.
- Write, proofread and consult on the creation of creative briefs, web and digital initiatives, promotions, and internal/external business communication.

- Build credibility by maintaining a detailed understanding of current genomics research and the competitive and technology landscape.

Who you are

In adding new members to our team, we look for people who are also inspired by our mission and who would fit in well with the collaborative, rigorous and entrepreneurial spirit of the company culture. Because we know that people are critical to our success in bringing novel diagnostics and medicines to patients, we are dedicated to creating a great place to work and to providing our people with programs, services and benefits that would allow them to bring the best to the business and to their personal and professional growth.

- PhD degree in life science or medical-related discipline; Molecular Biology, Genomics, Bioinformatics majors preferred.
- Minimum 1 year of project management experience within; pharmaceutical, biologics or medical device industry highly preferred, academic lab management experience also acceptable.
- Thorough knowledge of next-generation sequencing (NGS), genomic data analysis, liquid biopsy preferred.
- MBA, project management certification, or other business training is a plus.
- Demonstrated ability to develop positive working relationships with individuals and teams internally and externally.
- Ability to work independently as well as part of a cross functional team.
- Excellent problem solving ability necessary.
- Excellent written and verbal communication skills.
- Flexible attitude to adjust to changing client and regional needs.
- Ability and willingness to domestic and international travel 15% of the time.

This is an exciting opportunity to participate in, and to enable, our vision of transforming healthcare through development of innovative technologies. If you are looking for opportunities to accelerate your growth and the growth of a company, and to make a positive and immediate impact on the society, please submit cover letter and resume to: hr "at" predicine "dot" com.
